The latest trends in health and skin care result in an increased demand for skin repair and rejuvenation services - and skilled practitioners. Patients prefer to receive these services from a trusted doctor. Meeting your patients' aesthetic concerns and helping them to regain their healthy appearance and confidence will build long-term loyalty and add non-Medicare based revenue to your practice.

The intermediate course in the three-part pathway, the **Advanced Certificate of Aesthetic Medicine** will meet the needs of medical professionals who are interested in enhancing their clinical knowledge in aesthetic principles and the safe practice of the latest evidence-based aesthetic medicine procedures. Ideal for practitioners who are considering working in the field, the course provides a new level of confidence and competence relevant to primary care, enabling you to integrate cosmetic services into your day-to-day work. Delivered by GPs for GPs, the course features interactive lectures, case discussions, live demonstrations, and optional practical sessions on pork parts and simulated models.
